

Tilt hoist De-stacker

Machine Specifications

Bundle Width (mm) – 1200

Bundle Length (mm) – 3100

Bundle Height (mm) – 1200

Bundle Mass (kg) – 2100

Actuator (kW)– 5.5

Mass (kg) – 1200

Dimensions (mm) L – 2580

W – 2170

H – 1820

Power Rating (Kw) – 6

The tilt hoist enables the user to automate the feed process of a stack of timber, into a line for further processing. A simple yet effective solution to integrate continuous feed of timber into a system.

Our standard tilt hoist has a stack limit of 3m x 1.2m x 1.2m. The modular design means larger or smaller stacks can be easily accommodated.

Pinnacle does a full range of stackers and de-stackers for all stack sizes.
