

# Trim Saw

## Machine Specifications

Board Width (mm) – 40 - 240

Board Height (mm) – 20 - 80

Blade            Ø        – 500 mm  
                          Speed – 2800 rpm

Saw Motor – 4 kW 4 Pole

Feed Drive – 2.2 kw VSD

Mass (kg) – 2005

Dimensions (mm) L – 4100

                          W – 2750

                          H – 1230

Power Rating (Kw) – 15

The Trim Saw is an excellent cross cut when a lot of same length pieces are needed out of longer lengths. The robust design allows for continuous accuracy and efficiency.

Changing cut length is as quick as stopping the machine, unlocking the head and shifting it with the rack and pinion system. Key features include:

- Multiple blade heads can be fitted
- Rapid re-positioning of blade heads
- Modular design allows for customer specific machines
